

Disphar seeks a **Project Manager Research & Development**.

Company:

We have built a strong reputation as developer and supplier of innovative drug formulations. Our customer base includes leading companies in both the innovative as well as the multi-source pharmaceutical industry. Currently we employ 45 highly skilled professionals. The company culture can be characterised as entrepreneurial, informal and focused on customer-satisfaction.

Job description:

The project manager research & development is responsible for:

- Defining the development project plan, including the budget and timelines
- Controlling the progress of projects and periodically updating the project timelines
- Executing the product development program in cooperation with external CMO's and CRO's.
- Keeping track of resource usage to ensure within-budget execution of projects
- Searching for and recommending suitable development partners
- Ensure suitable protocols and plans of action
- Internal reporting to Project Team and stakeholders

Profile:

- Strong project management and communication skills
- Team builder, able to perform with a minimum level of supervision, works well with deadlines in a result driven organisation
- Hands on knowledge of pharmaceutical development strategy together with experience on formulation and process development.
- Good knowledge of the clinical aspects of product development.
- Knowledge of common analytical chemistry techniques used in the pharmaceutical sector.
- Ability to build cross disciplinary relationships within organisations
- Excellent command of the English language is a must.

We offer a competitive salary, company car and attractive bonus and pension plan.
